

CCL Network Troubleshooting Cheat Sheet

Wireless Connections in Chambers – Windows

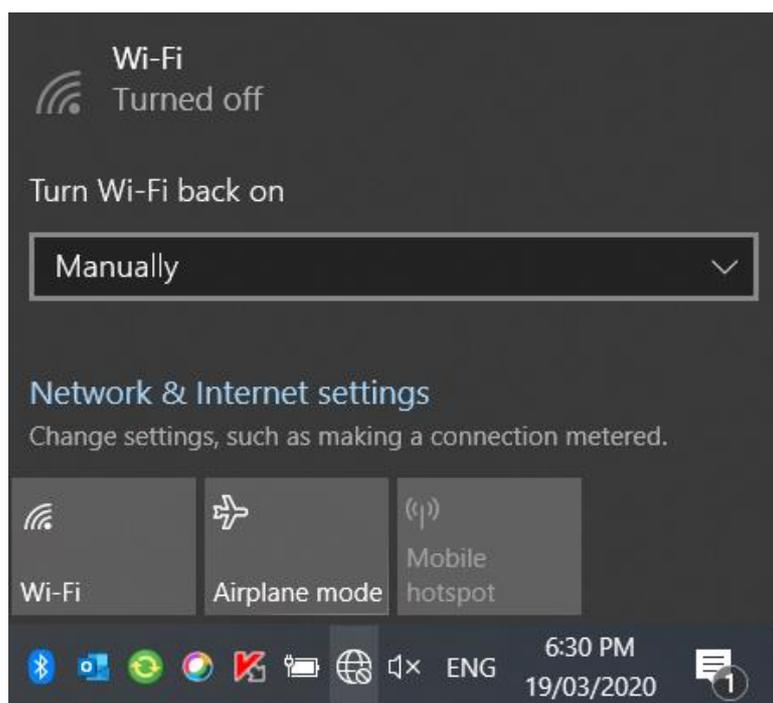

Please follow these steps if your Windows device is using the wireless network & you are having issues connecting to the CCL Network.

1. **Have you restarted your device?**

- If not, please close any open applications, **restart the computer** & see if this resolves your issues
- If the issue persists, please continue to Step 2

2. **Does the Windows device have wireless enabled & flight mode disabled?**

- Please check that your device has wireless enabled & flight mode disabled
- In Windows 10, click on the **wireless / network icon** in the bottom right of screen (as per image below)
- If **wireless is disabled**, please enable it & allow wireless functions to start up
- If **flight mode is enabled**, please disable it & allow wireless functions to start up
- Please then ensure that the **connection to CCL-Secure** starts successfully
- If the connection issue persists, please continue to Step 3

3. Is the Windows device connected to the correct wireless network?

- All user devices that connect to the CCL Network should connect to the **CCL-Secure** network
- If your **device is connected to a different network**, please select CCL-Secure from the list & **ensure that the connection switches successfully** (as per image below)
- If you cannot see CCL-Secure on the list of available networks, please contact CCL Network Support

4. If the issues are persisting, please complete further troubleshooting steps below:

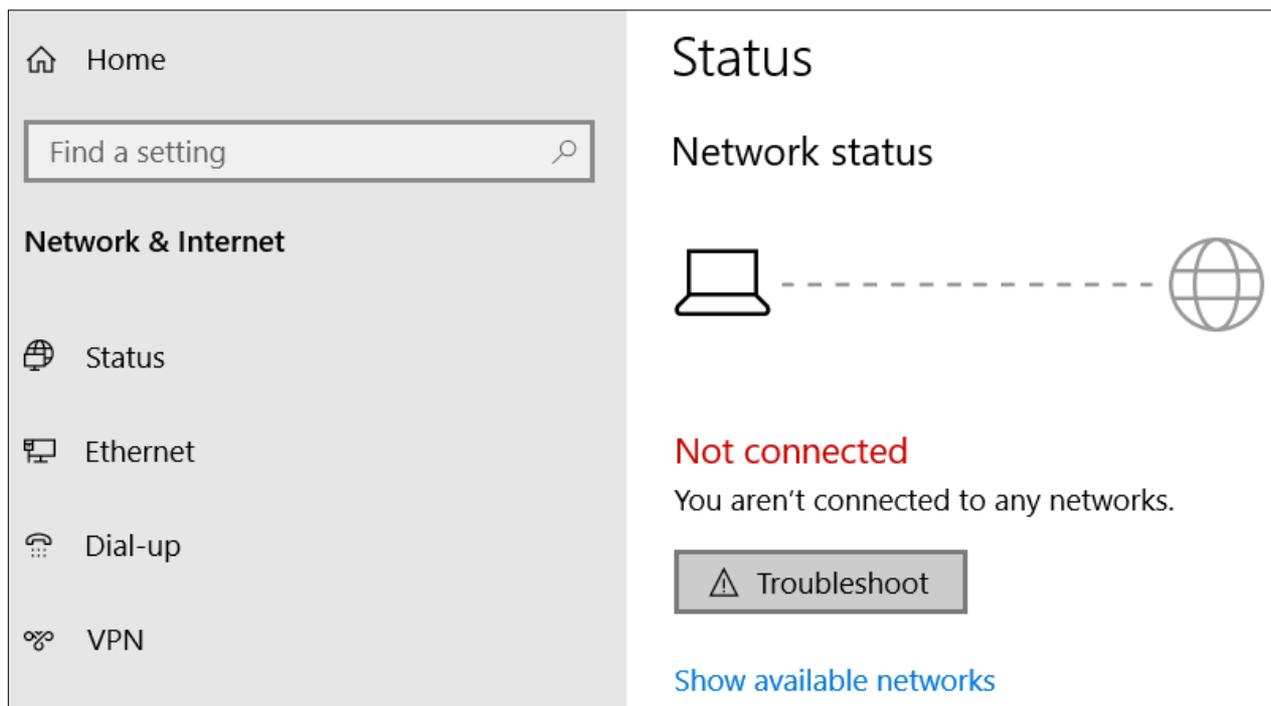

- Please open a web browser (Firefox, Chrome etc) & try to load an external website (Google, Wikipedia etc)
- An external website loading successfully is indicative of a working network connection
- If the website fails to load, please proceed to Step 5

5. If the issues are persisting, please complete further troubleshooting steps below:

- In Windows 10, please **open the Settings window** (click on the **Start Menu** icon & then the **Settings** cog)
- Click on **Network & Internet** item
- Click on **Troubleshoot** option (as per image below)
- This will possibly take some time to complete, please allow for the process to finish
- Once the **Network Troubleshooter** has completed, please check the status of your Internet access again

If all of the above steps have been completed & you still are unable to connect to the CCL Network, please contact CCL Network Support for further assistance on (02) 9221 6235 or via email at support@ccl.com.au.
