Configuring a Device for MS-CHAPv2 – Windows Wireless

Important: Before you proceed, as part of the set up for MS-CHAPv2, you will need your CCL Network username and password. If you are unsure of your username and password, you can verify or reset your password at <u>password.ccl.com.au</u>, or if you require any further assistance regarding the instructions below, please contact CCL Support via email at <u>support@ccl.com.au</u>.

By following the steps outlined below, you will migrate Windows Wireless connections to the CCL network from certificate-based authentication to username and password-based authentication (MS-CHAPv2):

1.	In the bottom right hand corner of your screen, click your WiFi icon (as pictured).	へ 索 🎐 🖮 🕼 🌈 ENG 10:53 US 22/06/2020 🏹
2.	Your device will be connected to <i>CCL-Secure</i> . Right-click this connection and select Forget .	CCL-Secure Disconnect Properties Disconnect Properties Forget Network & Internet settings Change settings, such as making a connection metered. Change settings, such as making a connection metered. Image: Connect of the setting o
3.	Once disconnected, select the CCL- Secure network again, and you will be asked for a <i>Username</i> and <i>Password</i> . Please enter your CCL Network Username and Password and select OK .	CCL-Secure Secured Enter your username and password Username Password OK Cancel

4. Your device will be now reconnected to CCL-Secure.	CCL-Secure Connected, secured	
Please verify that your internet connection is working. If it is, You are now successfully connected to the CCL Network via MS-CHAPv2.
