Interoperability

 Cisco Webex – Supported
Full support.

 Microsoft Teams – Supported

Microsoft Teams video conferences are fully supported in Hearing Room 1.

* Microsoft Teams meetings can be held in Hearing Room 2, however you will need to use your own laptop (with webcam) which can be displayed on the large screen using an HDMI cable.

Microsoft Teams meetings can be held in Party Room 5 using the audio-visual system, however will need to use your own laptop to connect to the meeting. The A/V equipment connects to your laptop over USB and HDMI and consists of a high definition camera, microphone/speakers and a large screen.

Zoom – Supported

Zoom video conferences are fully supported in Hearing Room 1.

** Zoom meetings can be held in Hearing Room 2, however with limited support.

Zoom meetings can be held in Party Room 5 using the audio-visual system, however will need to use your own laptop to connect to the meeting. The A/V equipment connects to your laptop over USB and HDMI and consists of a high definition camera, microphone/speakers and a large screen.

Bluejeans - Supported

Call meet@bjn.vc or <Meeting ID>@bjn.vc from Webex Teams or a room system.

<https://support.bluejeans.com/s/article/Connecting-Room-System-video-devices-to-a-meeting>

Generic SIP (Cisco / Polycom) – Supported

SIP endpoints can be dialled directly using the SIP URI from Webex Teams or a room system

Skype – Not Supported

Not supported. However, the video conference can be displayed on the Hearing room screen by connecting your laptop to the screen using an HDMI cable.

FaceTime – Not Supported

Not supported. However, the video conference can be displayed on the Hearing room screen by connecting your laptop to the screen using an HDMI cable.
