Counsel's Chambers Limited Network Device Connection – Mac OSX

Before connecting to the CCL network, it is recommended to create a new network 'Location' in your Mac's network settings. This will allow you to easily switch between the CCL network configuration and another network's configuration (e.g. your internet connection at home). To create a network location follow the instructions below

- (a) Click the Apple icon at the top left of the screen and click **System Preferences**.
- (b) Click Network.
- (c) Click on Location then click on Edit Locations.
- (d) Click on the + symbol to create a new location. Give the new location a name (eg. 'Chambers') then click **Done**.

(e) Make sure the new location is selected, then click **Apply** to save. You can now proceed with connecting to the CCL wireless network on page 2. To quickly switch between from the CCL network configuration to another network's configuration (e.g. your internet connection at home), click on the Apple icon at the top left of the screen, go to **Location**, then choose **Automatic**. When you are reconnecting back to the CCL network, choose **Chambers**.

1. Make sure Ethernet is connected
