

Connecting to the network: Android

COUNSEL'S
CHAMBERS
LIMITED

Connecting to the network: Android

Important:

Before you proceed, as part of connecting to the network, you will need your CCL Network username and password. If you are unsure of your username and password, you can verify or reset your password at password.ccl.com.au, or if you require any further assistance regarding the following instructions, please contact CCL Support via email at support@ccl.com.au.

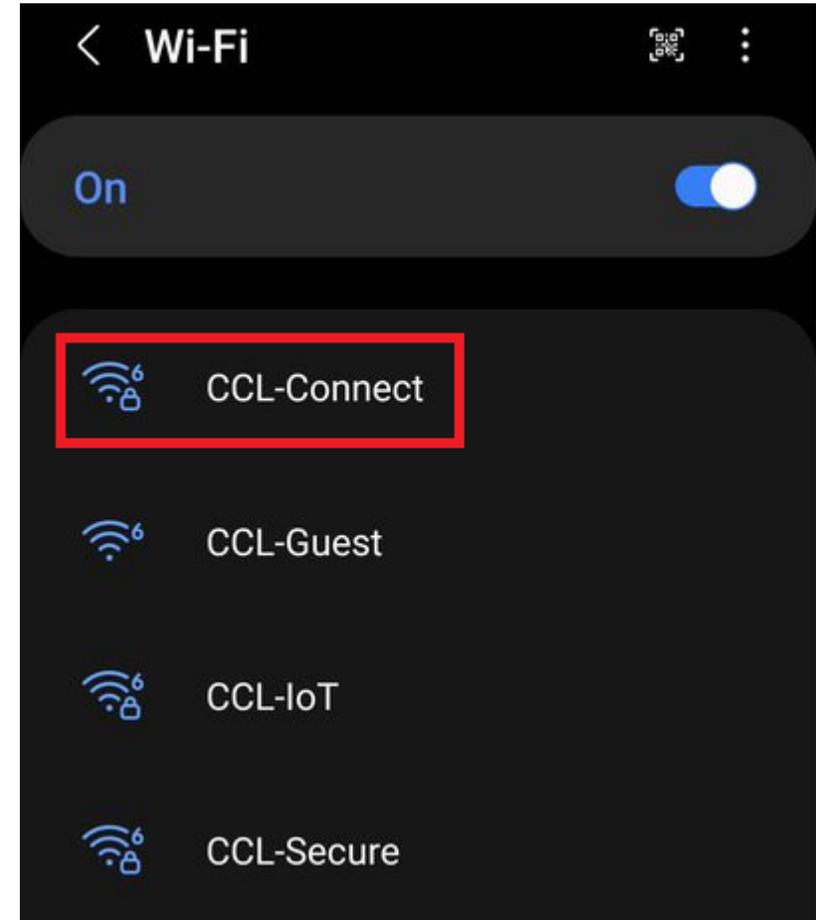

Step 1

Install the **Cisco Network Setup Assistant** app from the **Google Play Store**.

Step 1

Connect to the **CCL-Connect** wireless network.

Step 3

Please configure the network settings as seen below:

EAP Method: PEAP

Identity: Your CCL Username

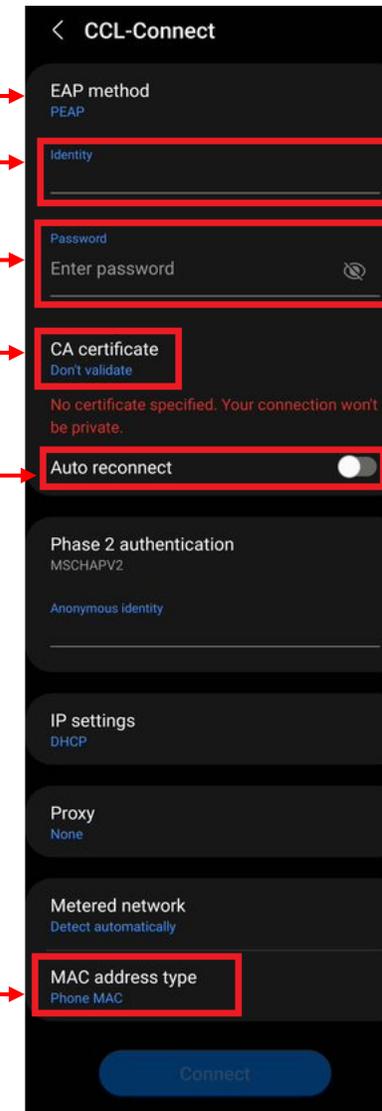

Password: Your CCL Password

CA Certificate: Don't validate

Auto reconnect: Off

MAC Address type: Phone MAC

Leave all remaining settings blank. Select **Connect**.

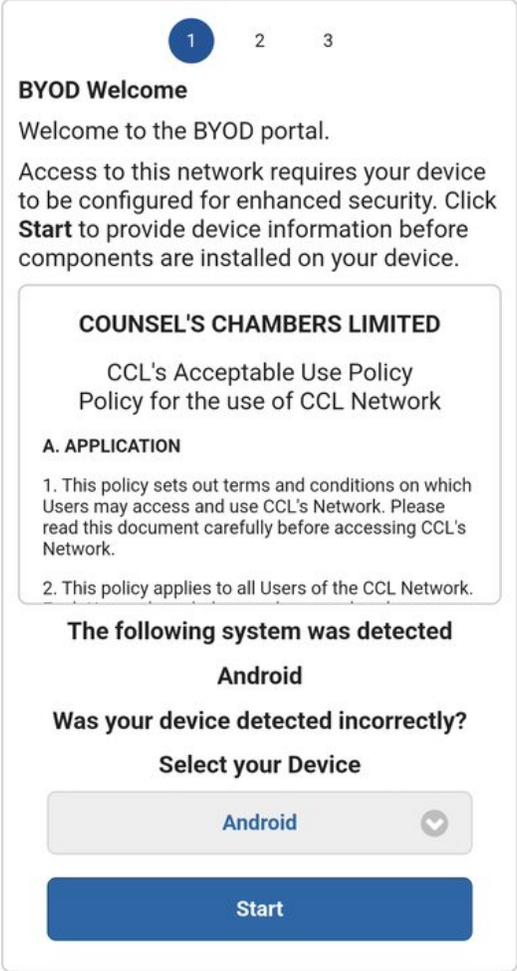

Step 4

Open the Google Chrome browser and type **login.ccl.com.au** in the address bar.

You will be redirected to the onboarding screen **BYOD Portal**. (This may happen Automatically on some devices).

After reviewing the CCL Network Acceptable Use Policy, click **Start**.

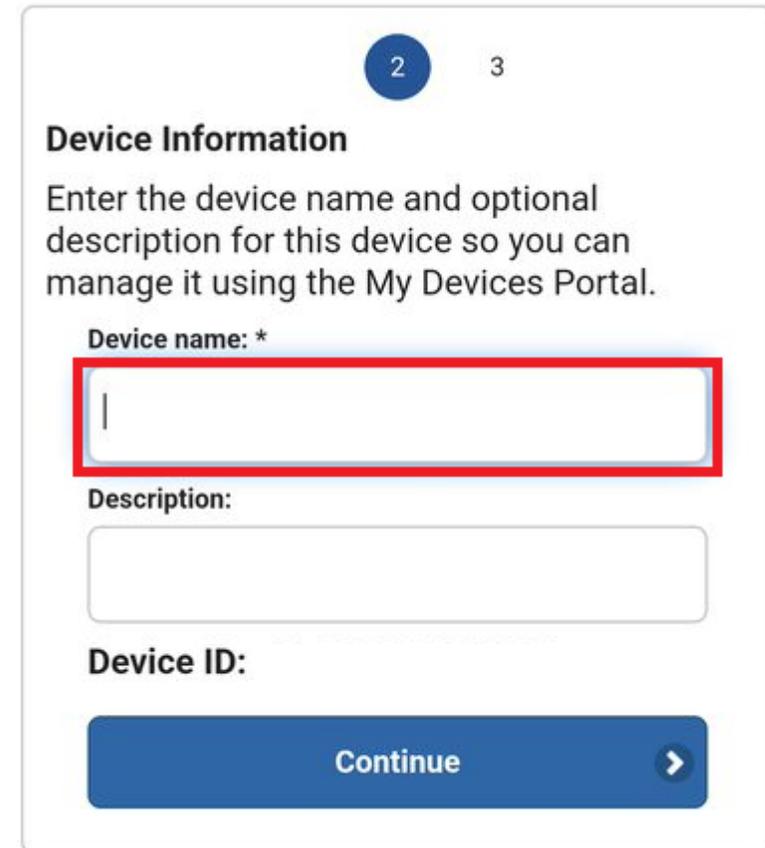

The screenshot shows a mobile interface for the BYOD portal. At the top, there are three numbered steps, with '1' highlighted in a blue circle. Below this is the heading 'BYOD Welcome' followed by a welcome message and instructions to click 'Start'. A box contains the 'COUNSEL'S CHAMBERS LIMITED' logo and the title 'CCL's Acceptable Use Policy for the use of CCL Network'. Underneath, section 'A. APPLICATION' lists two points about the policy. Below the policy is a system detection notice for 'Android', a question 'Was your device detected incorrectly?', a dropdown menu for 'Select your Device' (currently showing 'Android'), and a prominent blue 'Start' button.

Step 5

Enter a **Device name** and press **Continue**.

The description field is optional.

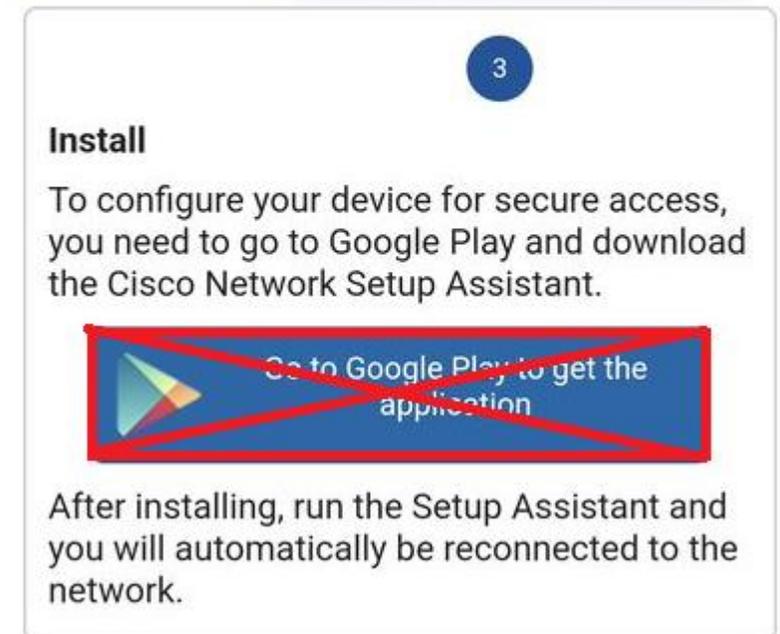

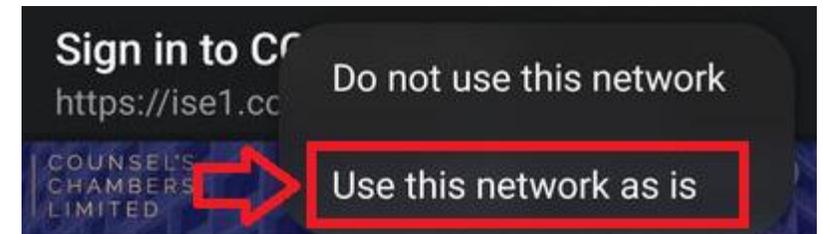

The screenshot shows a mobile application interface for device registration. At the top, there are two circular progress indicators, with the first one containing the number '2' and the second containing '3'. Below this is the section header 'Device Information'. A text prompt reads: 'Enter the device name and optional description for this device so you can manage it using the My Devices Portal.' There are three input fields: 'Device name: *' (highlighted with a red border), 'Description:', and 'Device ID:'. At the bottom of the form is a blue 'Continue' button with a right-pointing arrow.

Step 6

DO NOT press “Go to Google Play to get the application”

Instead, press the icon with the three dots as seen in the picture to the right and select **Use this network as is.**

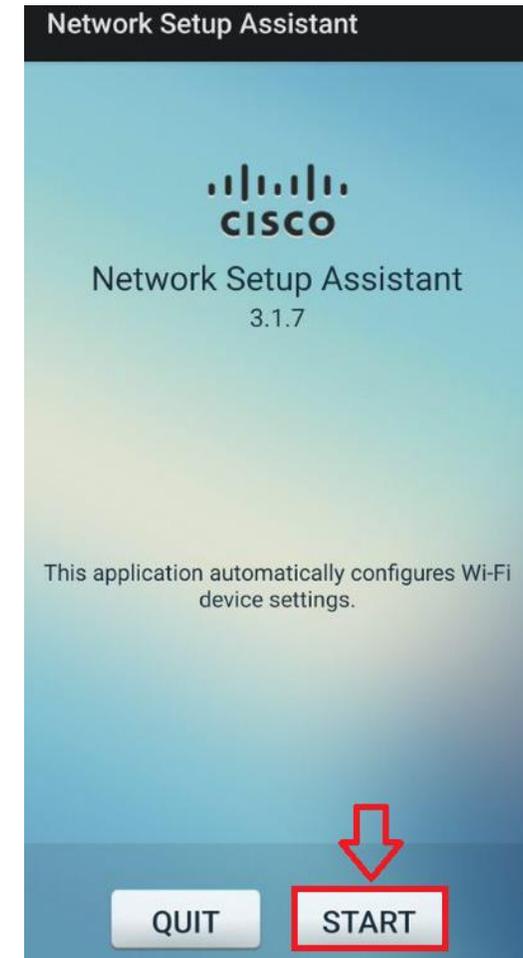

Your web browser should now close.

Step 7

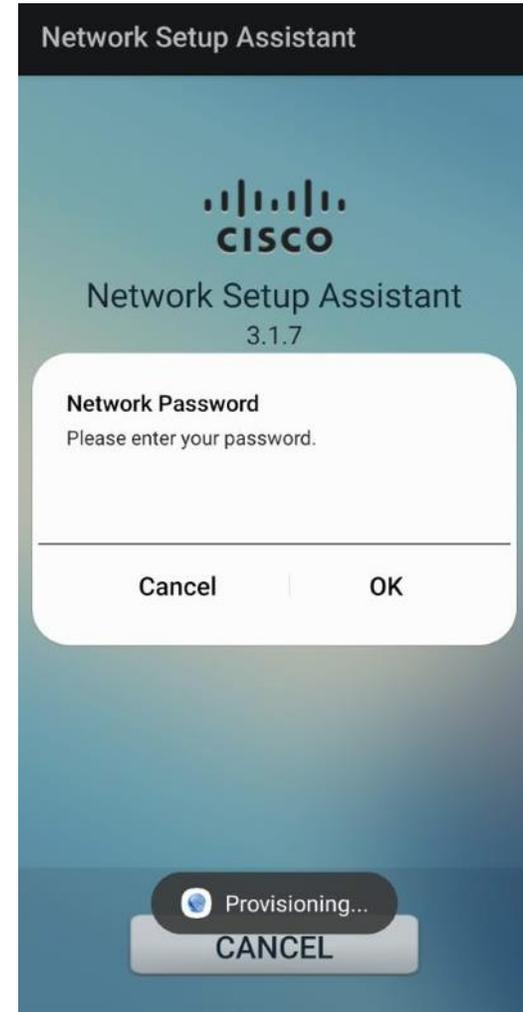

Open the **Network Setup Assistant** app
downloaded in **Step 1**.

Press **Start**.

Step 8

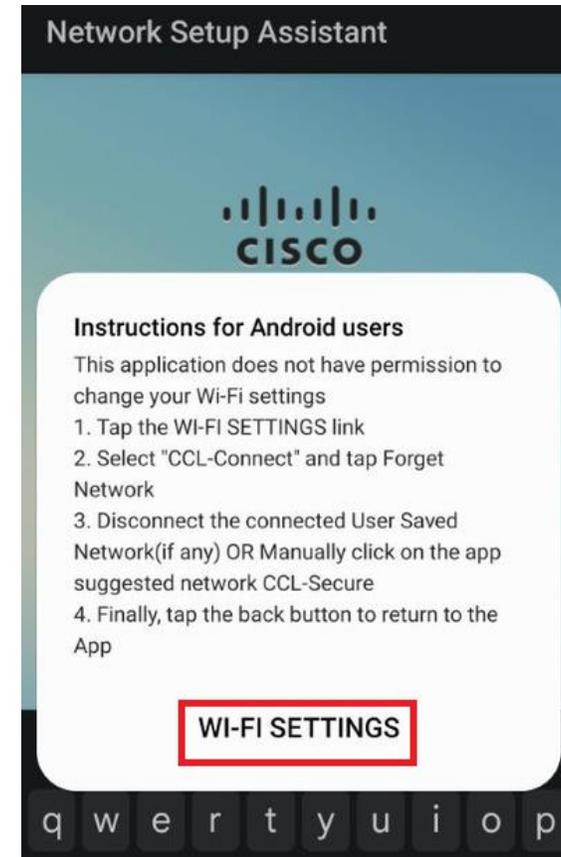

When prompted for a password, enter your
CCL network password and press **OK**.

Step 9

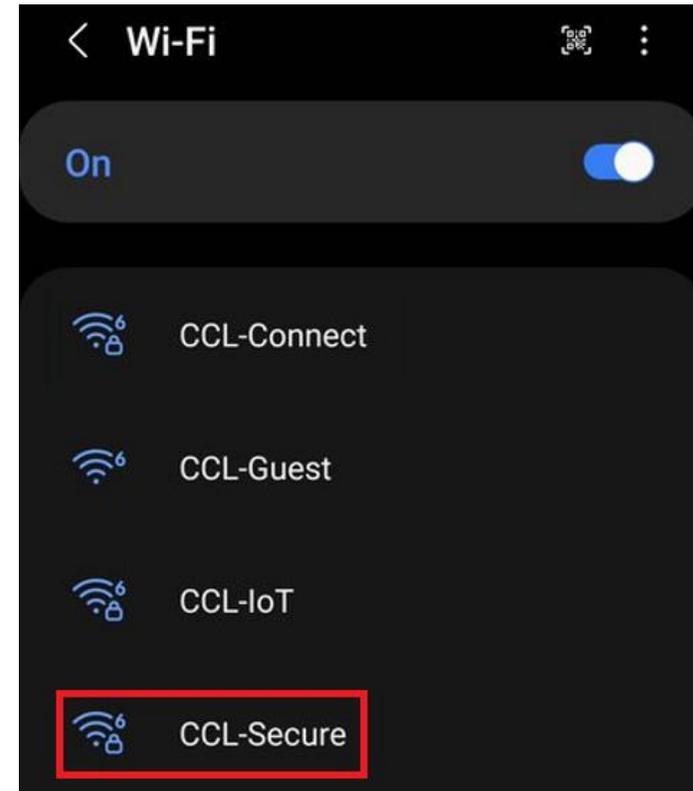

Once the app has finished provisioning your device, a screen named *Instructions for Android users* will open.

Click **Wi-Fi Settings**

Step 10

Connect to the **CCL-Secure** wireless network.

Step 11

Please configure the network settings as seen below:

EAP Method: PEAP

Identity: Your CCL Username

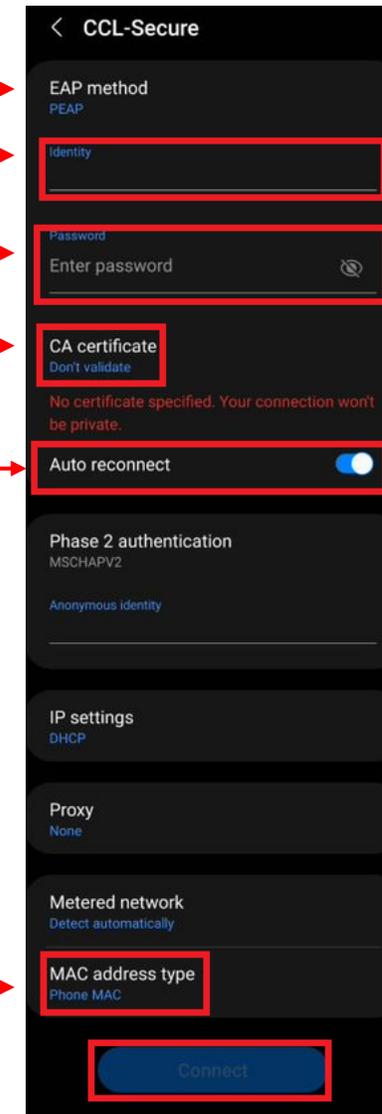

Password: Your CCL Password

CA Certificate: Don't validate

Auto reconnect: On

MAC Address type: Phone MAC

Leave all remaining settings blank. Select **Connect**.

Please verify that your internet connection is working. If it is, your device is now successfully connected to the CCL Network.

If you require any further assistance regarding the previous instructions, please contact CCL Support via email at support@ccl.com.au.
