

Taking your device home – Windows PC (Wired)

By following the steps outlined below, you be able to use your Windows Wired Chambers PC external from the CCL Network (e.g. taking the device home):

<p>1. <i>Right-click</i> the network icon and select Open Network & Internet settings</p>	
<p>2. Click on Change adapter options</p>	
<p>3. <i>Right-click</i> the Ethernet adapter and select Properties</p>	
<p>4. Select Authentication, and untick Enable IEEE 802.1X Authentication. Click Ok.</p>	
<p>You will now be able to use your Windows Wired Chambers PC external from the CCL Network. Please Note: These settings will need to be reverted once the device is returned to Chambers</p>
