

Webex Setup Guide

1. Cisco Webex is available on **Windows, macOS, Android** and **iOS** devices. To install the app on various platforms, please follow these steps:
 - a. For **Windows** and **macOS** users, please visit <https://www.webex.com/downloads.html> to download the software
 - b. For **Android** and **iOS** users, please visit the **Play Store** or **App Store**, search for “Webex”, and install the app
Note: Please do not download “Webex Meetings” app instead as it is being discontinued.
2. After installing Webex on your device, launch it. You will need to enter your **primary CCL email address** and press *Next* or *Continue*

Note: Your primary CCL email address is what appears on outgoing emails.

3. On the following screen, sign in using your **primary CCL email address** and **CCL network password**

Get Started with Webex

Below is a link to some useful information on how to make the most of using Webex:
